

HIRSCH
PEDIATRICS

Congratulations!

You have reached the important milestone of turning 22!

We have enjoyed watching you mature into a thriving adult. We are writing this letter to ensure you have a smooth healthcare transition to adult medicine.

Now that I am over 21, do I need a new doctor?

- Yes! We are sad to say goodbye but as a pediatric office we are only able to care for patients through age 21.

So how do I find a doctor?

- Any internal medicine or family practice office can provide your ongoing adult healthcare. Your health insurance website has a list of providers that are close to you and in-network, or we can provide a list of local practices.

How do I get my medical records?

- To request a full copy of your medical records from our office, please sign and return the records request form from our website. We will mail you a copy of your medical records on a flash drive. There is no charge to receive a copy of your health records.

We wish you many years of health and success. It has truly been a privilege to get to know you and your family.

Sincerely,

Steven F. Hirsch, MD, FAAP
